

Front End Developer

Derby, £30,000+ p/a, depending on experience + benefits

We're looking for a skilled and talented Front-end Developer with a keen eye for detail and excellence to join our team on a permanent basis.

This role isn't your standard role... we are involved in some creatively led digital development projects. With brand new offices and a host of new clients on the way this truly is an exciting time to be joining us. You'll work with some of the well recognised and highly creative brands on an ongoing project by project basis.

The skills we require:

- JavaScript, inc. jQuery
- HTML, inc. HTML5
- CSS, inc. CSS3
- Excellent eye for detail and quality

Any PHP skills or other JavaScript tech, AngularJS, Node.js (these are not essential but any experience could be advantageous).

Attention to detail and a keen eye for pixel perfect front end development is highly important.

We are ideally looking for a IT graduate (non graduates will be considered) with 3+ years commercial experience working on client projects and with different tech. A personality is a must in an outgoing environment but a creative mind behind this could be the perfect match.
